PROFESSIONAL EXPERIENCE

Wright-Patt Credit Union | API Developer Intern — May 2026 – Present

- Built a Go-based Microsoft Purview ingestion pipeline that retrieves asynchronous audit results, transforms nested security-event data into normalized records, and persists them to SQL Server.
- Improved data integrity by implementing transactional GORM batch inserts across related database tables, preventing partial writes when an operation fails.
- Increased pipeline reliability through payload validation, duplicate detection, HTTP timeouts, bounded polling, and structured error handling.
- Prevented incomplete audit-log processing by implementing an atomic remote-to-local file-copy workflow, containerizing the service via multi-stage Docker builds, and validating with Go unit tests.

WSU Raider Immersion | Software Engineering Intern (ARS) — May 2026 – Present

- Decomposed system safety data collection requirements into structured data models by analyzing military standards (MIL-STD-882E, DI-SESS-80255B).
- Implemented a full-stack web application (Go, PostgreSQL, Vite/Tailwind) featuring automated Playwright E2E testing for Applied Research Solutions.
- Collaborated with an engineering team, participating in bi-weekly standups and stakeholder reviews to ensure completion of delegated milestones.

WSU Raider Immersion | Software Engineering Intern (Booz Allen) — Jan 2026 – May 2026

- Supported Booz Allen Hamilton's missile modeling and simulation team by developing and analyzing dynamic and kinematic models of missiles and aircraft systems.
- Integrated software APIs to ingest vehicle geometry data, transforming 3D models into validated datasets for kinematic and aerodynamic simulations.
- Collaborated with a multidisciplinary team to ensure completion of delegated milestones, participating in standups and technical reviews.

Wright State University | Java Lab Leader / Teaching Assistant — Aug 2024 – Dec 2025

- Led weekly lab sessions for 60+ students per semester, teaching Java fundamentals (OOP, data structures, exception handling).
- Conducted technical code reviews for ~40 weekly assignments and 4 semester projects, providing targeted feedback to debug and optimize code.
- Facilitated 5 weekly office hours to provide one-on-one troubleshooting and mentoring for complex programming challenges.

EDUCATION

Wright State University | CECS | B.S. Computer Engineering — August 2023 – December 2026

ADDITIONAL SKILLS

- **Languages:** Java, Python, C++, Go, Kotlin.
- **Frameworks & Libraries:** Jetpack Compose, Tailwind, Playwright, GORM.
- **Systems & Tools:** Linux, AWS, PostgreSQL, SQL Server, Docker, GitLab, Kong, Grafana, Vite, DevOps.

PROJECTS

QJAM (2026 WSU Hackathon) | Real-time collaborative music queueing web app

- Developed a high-performance backend using FastAPI and WebSockets for real-time state sync across clients.
- Implemented reproducible development environments using Nix and containerized with Docker.
- Collaborated with a team of 3 to ship a functional MVP within the 24-hour hackathon timeframe.

PowerTrip | Android app to track car fuel/energy usage and costs from a server

- Kotlin + Jetpack Compose app with a Python/Flask backend: tracked vehicle fuel/energy usage via RESTful endpoints.

SwingEuchre with Pytrick | Playable Euchre game with AI opponents

- Euchre card game with a graphical interface using Java Swing, and integrated a PyTorch based AI opponent.

AWARDS & ACHIEVEMENTS

- **2026 WSU Hackathon:** Won the Reynolds & Reynolds “Most Likely to Ship” award.
- **2025 WSU Hackathon:** Team won two overall awards.
- **2024 WSU Game Jam:** Awarded both the TAs' Choice and Students' Choice.
