## PROFESSIONAL EXPERIENCE

**Wright-Patt Credit Union** | API Developer Intern — May 2026 – Present

- Built production-ready RESTful APIs in Go using the Gin framework to connect and integrate enterprise applications.
- Managed API deployments and testing on Linux systems, applying core DevOps practices to ensure reliable releases.
- Monitored overall API performance and configured Kong for basic traffic routing and security.
- Maintained clear technical documentation and participated in daily standups to track the progress of stories and epics.

**Wright State University** | Raider Immersion Intern — January 2026 – Present

- Supporting Booz Allen's missile modeling and simulation team to develop and analyze dynamic and kinematic models of missiles and aircraft systems.
- Developing a user-friendly workflow and graphical interface that integrates with an open-source software API to verify program input and validate program output.
- Collaborating with a multidisciplinary team to ensure completion of delegated milestones, participating in standups to report progress and perform technical reviews.

**Becton Enterprises, LLC** | Software Engineering Intern — September 2025 – December 2025

- Completed a self-paced technical training curriculum focused on Python, RESTful API design, version control (Git), and Agile development.
- Interfaced directly with the CEO in weekly syncs to review progress on technical learning assignments and discuss software development concepts.

**Wright State University** | Java Lab Leader/Teaching Assistant — August 2024 – December 2025

- Instructed students in Java fundamentals, including OOP, data structures, algorithms, and exception handling.
- Graded assignments and provided detailed feedback to improve student comprehension.
- Hosted office hours to provide personalized tutoring for complex programming challenges.

## EDUCATION

**Wright State University** | | B.S. in Computer Engineering — August 2023 – December 2026

## RELEVANT COURSEWORK

- Data Structures & Algorithms, Operating Systems Concepts & Usage, Computer Organization, Digital System Design, Computer Science I & II, Discrete Structures & Algorithms, Operating System Internals & Design

## ADDITIONAL SKILLS

- **Languages:** Java, Kotlin, Python, Dart, C++, Go, Bash.
- **Systems & Cloud:** Linux systems, AWS, DevOps, Kong, Grafana.

## PROJECTS

**QJAM (2026 WSU Hackathon)** | Real-time collaborative music queueing web app

- Developed a high-performance backend using FastAPI and WebSockets for real-time state sync across clients.
- Implemented reproducible development environments using Nix and containerized with Docker.
- Collaborated with a team of 3 to ship a functional MVP within the 24-hour hackathon timeframe.

**PowerTrip** | Flutter app to track car fuel/energy usage and costs from a server

- Flutter + Python/Flask API: tracked car fuel usage via RESTful endpoints.

**SwingEuchre with Pytrick** | Playable Euchre game with AI opponents

- Euchre card game with a graphical interface using Java Swing, and integrated a PyTorch based AI opponent.

## AWARDS & ACHIEVEMENTS

- **2026 WSU Hackathon:** Won the Reynolds & Reynolds "Most Likely to Ship" award.
- **2025 WSU Hackathon:** Team won two overall awards.
- **2024 WSU Game Jam:** Awarded both the TAs' Choice and Students' Choice.
